Fractal Image Compression - fileformat.info Fractal Image Compression. Fractal encoding is a mathematical process used to encode bitmaps containing a real-world image as a set of mathematical data that describes the fractal properties of the image. Fractal Image Compression - Image Compression | Coursera Fractal image compression relates to vector quantization, but unlike VQ where, a codebook needs to be transmitted to the decoder with fractal encoding this codebook is a virtual one. Fractal Image Encoding and ... - citeseerx.ist.psu.edu This fractal-based denoising algorithm can be applied in the pixel and the wavelet domains of the noisy image using standard fractal and fractal-wavelet schemes, respectively. Furthermore, the cycle spinning idea was implemented in order to enhance the quality of the fractally denoised estimates.

Cuckoo inspired fast search algorithm for fractal image ... The high encoding time due to the complex search in identifying the similar blocks in given image is the significant constraint of the traditional fractal image compression, which has the iterated function system (Barnsley and Sloan, 1990) as backbone of the fractal image compression. Hence the decreasing encoding time in fractal image.
